EDUCATION

California State University of Long Beach   **December 2025**
B.S., Computer Science
- CS GPA: 3.7
- Undergraduate Coursework: Data Structures; Programming Languages; Computer Architecture; Calculus I & II, Android App Development, Object-Oriented Programming

SOFTWARE PROJECTS

Projects
- **Kid Laroi Fan App** (2022). Using Java and XML in Android Studio, enabling users to reserve concert tickets, listen to music, and explore the artist's social media platforms.
- **Vending Machine Website** (2023). Developed a website for a local vending machine business, focusing on user-friendly design and content presentation.
- **Mobile Bartending Website** (2024). Designed and implemented a mobile bartending website for a local business. Utilized HTML, CSS, JavaScript, and React to enhance user experience and functionality. Link: https://socialhourla.com

Skills
Languages: HTML, CSS, Javascript, Python, Java
Technologies: React, Visual Studio Code, Github, Docker

TECHNICAL EXPERIENCE

Internship   **Codeday**   **Nov 2023 - Dec 2023**

- Implemented a critical frontend feature for CodeCheck.io, an anonymous autograder, enhancing the grading process for teachers.
- With a team developed frontend functionality in a JavaScript file, sorting a dynamic table that displays student submissions using HTML and CSS elements.

Website Builder   **Agency 241**   **Sep 2023 - Dec 2023**

- Spearheaded front-end website enhancements and executed impactful email marketing campaigns, resulting in a 4x increase in web traffic and a 50% boost in sales within a three-month period.
- Collaborated with a dynamic team of marketing enthusiasts within the AMA-CSULB (American Marketing Association) Collegiate Chapter to drive successful digital marketing initiatives.
